

# MÜTTER GEGEN ATOMKRAFT

MOTHERS AGAINST NUCLEAR POWER

committed • independent  
critical • resolute

## ► We cooperate

- as a team in the management board
- in project groups on current topics
- with other anti-nuclear initiatives and environment organisation
- and document our activity on our Website [www.muettergegenatomkraft.de](http://www.muettergegenatomkraft.de)

## ► We demand

- the immediate closure of all German nuclear power plants
- not to use EU tax funds or to make public guarantees for building new atomic energy plants worldwide
- the search in Germany for a final storage space for nuclear waste should include all areas
- the final denuclearization must be anchored in the German Constitution.

## ► We want

- a life without fear of additional nuclear energy accidents
- to accept the responsibility for future generations
- to preserve our natural resources.

## ► Therefore, we need

- a change to 100 % renewable energy, decentralized, regional, connected with public participation
- more public support for saving energy
- technology support for energy efficiency projects.

## ► We participate

- in politics and economy
- through the media
- in national demonstrations
- in local activities
- since 1986 after the meltdown accident in Chernobyl.

## ► We help

- the children from Chernobyl
- we collect donations in kind (e.g. clothing, toys, Christmas groceries) and finance urgently needed medical equipment
- we organize the transportation to Ukraine
- we maintain constant contact with Ukrainian hospitals and social organizations.

Dear Friends,

I am writing with my deepest feelings of thanks for the care of my child.

My heartfelt thanks for your support during these most difficult times, (we are currently in a children's oncological hospital).

We use most of the money for the treatment for our son, Tymofij.

With great happiness, we accept this present. Again, sincere thanks for this generous help, also in the name of Tymofij.

With deep respect,

Diana
